## CABI launches Global Partnership for Pesticide Risk Reduction

CABI, in collaboration with its global partners, is set to launch the Global Partnership for Pesticide Risk Reduction on 19th May 2026 through an expert webinar bringing together key stakeholders from the public and private sectors. The initiative aims to strengthen international collaboration in addressing pesticide risks while supporting the transition toward safer and more sustainable agricultural systems worldwide.

Although synthetic pesticides have played a major role in protecting crop yields and food production, increasing scientific evidence highlights serious concerns regarding their impact on human and animal health, environmental safety, and biodiversity. In addition, several active ingredients currently used in many countries are restricted or banned in high-value international export markets, creating growing challenges for agricultural trade.

The newly launched partnership seeks to promote coordinated global action through evidence-based strategies and practical interventions that protect farmers, consumers, ecosystems, and agricultural productivity.

The initiative builds upon consultations conducted with CABI Member Countries and international partners throughout 2025.

## IPM PROFESSIONAL IN PAKISTAN

Mr. Adnan Rauf

CEO, HAFI Pest Control Services

He is a Pakistani entrepreneur, Food Safety Auditor, and social worker, currently serving as the CEO of HAFI Pest Control Services. He has been actively associated with the fields of pest management, food safety, hygiene awareness, and community services for 14 years of experience.

He received professional training as a Food Safety Auditor from Minhaj University Lahore. He has extensive experience in termite control, fumigation, hygiene management, food safety standards, and professional pest management services. Under his leadership, HAFI Pest Control Services has been providing quality services to residential, commercial, and corporate sectors with a strong commitment to professionalism, safety, and customer satisfaction. Alongside his professional activities, he also participates in social welfare and public awareness initiatives.

## Skilltech Regional Training Webinar – Termite Management Masterclass

FAOPMA recently delivered its Termite Management Masterclass, bringing together nearly 500 pest management professionals from across the Asia-Oceania region for a highly engaging and practical session. The online webinar focused on advancing technical knowledge and field-based practices in termite management. It featured expert-led sessions covering termite biology and behavior, inspection techniques, treatment strategies, and the application of integrated pest management (IPM) approaches for long-term structural protection.

The training also highlighted modern termite control tools and methods, including soil treatments, baiting systems, and preventive strategies aligned with sustainable pest management standards. Participants gained practical insights into real-world challenges faced in termite control operations, along with region-specific case discussions.

**ARE YOU CONTROLLING TERMITES OR MANAGING TERMITE RISK?**

**FAOPMA**  
SKILLTECH REGIONAL TRAINING SERIES 2026  
INAUGURAL TECHNICAL PROGRAM

**TERMITE MANAGEMENT MASTERCLASS**  
**Termites Without Borders**  
Science, Strategy, Sustainable Control  
A Regional Technical Training for Pest Management Companies and Professionals Across Asia & Oceania

**Tue 17th**  
March 2026  
8:10 AM / 5N 12:30 PM / AUS 3:30 PM  
Online (Live will be shared upon registration)

The event attracted a strong audience of industry professionals, technicians, and consultants, reflecting the growing demand for specialized termite management training in the pest control sector across Asia and Oceania. This masterclass formed part of FAOPMA's broader commitment to capacity building and knowledge sharing within the professional pest management industry, strengthening technical skills and promoting best practices in termite control across the region.
